

Important info for installation of GrowOff

Basic info

- Weight: 190 kg
- Height: 2,1 meter. With pallet: 2,30 meter
- Width: 1,32 meter

1 Electricity installation

GrowOff is connected to electricity with a regular power plug. In addition here is some useful info →

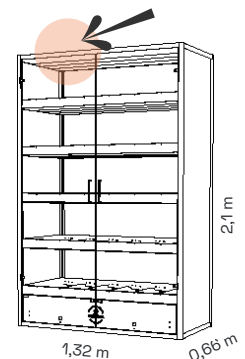

- 10 Amp power plug
- Electricity is connected at the roof of the module
- Length of power cable: 8m
- Power plug must be plugged in to a grounded outlet
- Power per module: 550W

2 Water-installation

To connect GrowOff to water your plumber may need the following information →

We recommend installing a water circuit breaker to the module.

- Water hose is connected at the roof of the module, back left corner
- Height: 2,1 m
- 1/2 " connector (female) to tap water
- Length of water hose: 15cm

3 4G connection

Your GrowOff comes with a 4G router to connect to the module, here is how to connect it →

- Besides the power cable and waterhose there is a third cable at the roof of the module
- The cable is split in two connectors, connect to router in the LAN port and the DC-port

When all the cables and water hose is connected, electricity can be turned on to the module with the power switch on the power cable.
